

Dulverton Waste Management

Environmental **Policy**

Responsible Environmental Management

Dulverton Waste Management operates the principal Landfill on the North West Coast of Tasmania. We are committed to the pursuit of providing a safe and sustainable environmental waste management, minimisation and recycling service for our community.

Environmental Commitments

We are committed to:

- play a leading role in promoting best practice in our industry
- prevention of pollution and minimisation of waste;
- compliance with applicable legal requirements and with other requirements to which the organisation subscribes;
- communicate with all persons working for or on behalf of the organization the requirements of the environmental management system;
- minimise and where possible avoid adverse impacts on our stakeholders, environment and social surrounds;
- the reduction of suitable waste stream volumes to landfill, through effective reuse, composting and minimization strategies; and
- understand and minimise our greenhouse gas contribution

Continual Improvement

We will:

- actively pursue continual improvement in environmental management;
- providing a framework for setting and reviewing environmental objectives and targets; and
- implement and maintain an environmental management system certified to ISO 14001:2004.

Environmental Performance

We will regularly review our environmental performance through:

- management review of the system;
- progress against objectives and targets; and
- internal and external audit.

Community

We will:

- work cooperatively with our stakeholders and the community; and
- provide environmental policy and other pertinent environmental information through the Authority website.
